FROM: Joe Fojon 

RE: Asbestos Hazard Emergency Response Act

The Ramsey Board of Education has recently completed its required inspection of the District facilities in accordance with the Federally Mandated Asbestos Hazard Emergency Response Act (AHERA) 40 CFR 763 subpart E. The Asbestos Managed Plan for the High School is available in the General Office at the High School and at the BOE Building.

As part of this inspection process, we as a District are required to notify the parents, faculty, and staff annually of any pertinent changes in the District relating to asbestos containing materials. There were several changes in the asbestos containing materials identified in our management plan at the High School. Asbestos was abated from the Boiler Room, the lower level, Wood Shop, Mitchell Gym, CR 213, CR 214, the Kitchen Director's Office. The inspection reports are on file in the General Office at the High School and at the BOE Building.

All asbestos containing materials within the District are part of an ongoing Operations and Maintenance Program to keep the materials properly maintained.

Should you have any questions regarding the most recent inspection of the condition of asbestos containing materials within the District, please contact our appointed District Representative, Joseph A. Fojon, Supervisor of Buildings and Grounds at (201) 785-2300 extension 20409.

July 2022

Dear Parent:

The Ramsey Board of Education has recently completed its required inspection of the District facilities in accordance with the Federally Mandated Asbestos Hazard Emergency Response Act (AHERA) 40 CFR 763 subpart E. The Asbestos Managed Plan for the High School is available in the General Office at the High School and at the BOE Building.

As part of this inspection process, we as a District are required to notify the parents, faculty, and staff annually of any pertinent changes in the District relating to asbestos containing materials. There were several changes in the asbestos containing materials identified in our management plan at the High School. Asbestos was abated from the Boiler Room, the lower level, Wood Shop, Mitchell Gym, CR 213, CR 214, the Kitchen Director's Office. The inspection reports are on file in the General Office at the High School and at the BOE Building.

All asbestos containing materials within the District are part of an ongoing Operations and Maintenance Program to keep the materials properly maintained.

Should you have any questions regarding the most recent inspection or the condition of asbestos containing materials within the District, please contact our appointed District Representative, Joseph A. Fojon, Supervisor of Buildings and Grounds at (201) 785-2300, extension 20409.

Very truly yours,

Joseph A. Fojon

Supervisor of Buildings & Grounds
